

Author

Display the writer(s) of an article.

[Overview](#)

[Specs](#)

[Guidelines](#)

Usage

Besides being used in articles, the Author component can also be used in article teasers (e.g. in a news listing). A mix of different authors is allowed.

Together with our clients we transform ambition into lasting and sustainable impact

Content

Author Data

Including the author's name helps establish credibility and trust.

- Use full names and ensure consistency across articles.
- If multiple contributors are involved, use the [multi-author](#) component.
- Author data can be used in structured schema markup (e.g., **Article** or **BlogPosting** schema), which improves how content is indexed and displayed in search results.

Article authors

 Vivian Holloway
Lead Researcher

✔ Do

Ensure each author component in the list includes the same information.

 Jean-Michel Baligand-Outters
Press relations officer

✔ Do

Use a clear picture for the avatar.

 Jean-Michel Baligand-Outters
Press relations officer

⊗ Don't

Don't use vague imagery for the avatar.

Publication date

The date of publication signals content freshness, which is important for time-sensitive topics to help users assess relevance.

We recommend the following format for displaying the dates: **Month + Day, Year**. E.g. January 31, 2025.

✔ Do

 Capgemini
Jan 31, 2025

Use the correct date format.

⊗ Don't

 Capgemini
01.02.25

Don't use non-compliant date formatting.
