

Eyebrow

Indicate category or topic above a headline.

Overview Specs Guidelines

Usage

Eyebrows are used exclusively on specific components such as Heros and [headline sections](#). They should never appear as standalone text or outside these contexts.

Interaction

Eyebrows are static typographic elements and do not support interaction, such as links or hover states.

— [Data and AI](#)

Turning bold visions into
meaningful outcomes

⊗ Don't

Don't make the eyebrow a link.

Content

Eyebrow text should be concise (typically one or two words) and serve as a category or topic indicator. Avoid full sentences or promotional language but focus on clarity and relevance.

— Data and AI

Turning bold visions into
meaningful outcomes

✓ Do

Make sure the eyebrow indicates a category or topic.

— How it comes to live

Turning bold visions into
meaningful outcomes

⊗ Don't

Avoid unnecessary or decorative wording in eyebrows.
