

Modal

Surface critical information that demands attention.

Overview

Specs

Guidelines

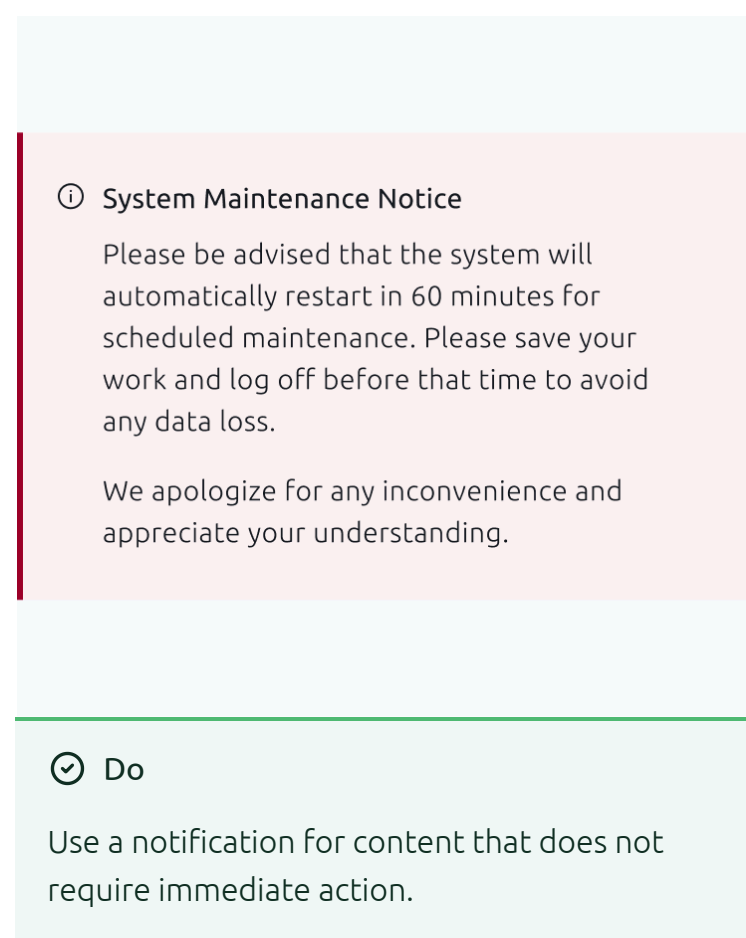

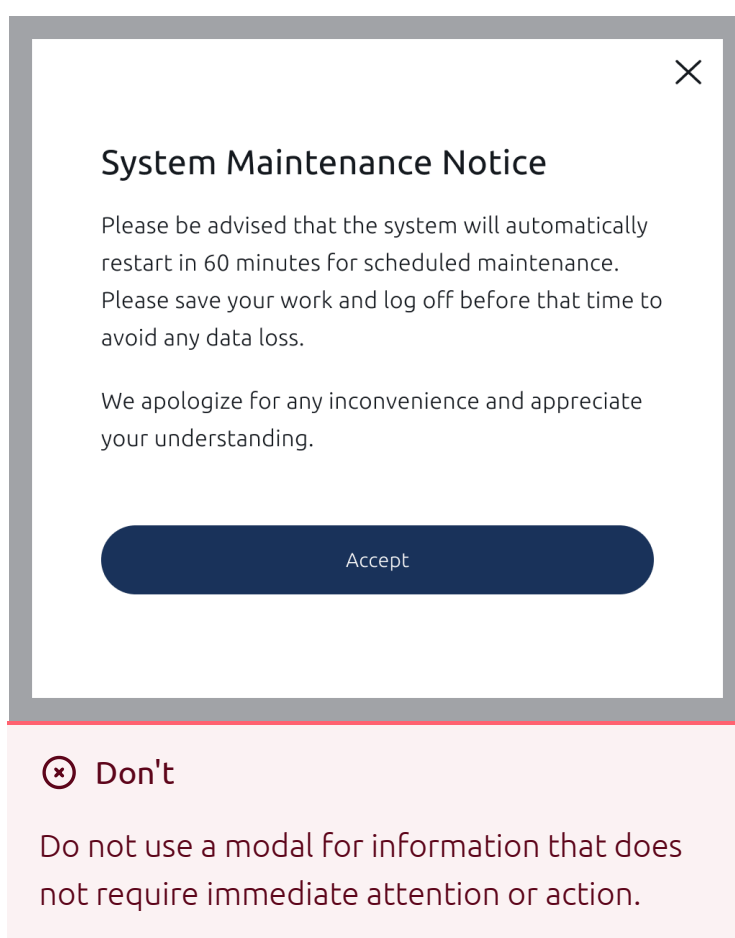

Usage

When to use

- For critical decisions, such as warnings and alerts.
- For input that is required before continuing.
- For authentication or permissions.
- For notifications of urgent information that must not be missed.

When not to use

- For complex or multi-step tasks.
- For extensive data gathering. Use the [form on page](#) of [form in drawer](#) component instead.

Content

Content in modal should be as short and informative and possible. No ambiguity is allowed in content writing for a modal.

✕

Consent or not

I hereby give my explicit consent to Capgemini for the collection, storage, and processing of my personal data. This consent is granted for the specific purpose of enabling Capgemini to contact me and provide information regarding their services, solutions, offerings, and other relevant communications that may be of interest to me. I understand that my data may be used in accordance with applicable data protection laws and that it will be handled securely and responsibly by Capgemini and its authorized affiliates.

For a comprehensive explanation of how my personal information will be used, including details on data retention, sharing, and my rights regarding access, correction, and deletion of my data, I acknowledge that I have read and understood the terms outlined in Capgemini’s Privacy Notice. I am aware that I can withdraw my consent at any time by following the instructions provided in the Privacy Notice.

I give my consent to this privacy policy

I do not consent to this privacy policy

⊗ Don't

Don’t use unclear headlines, long, hard-to-read body text, and buttons that don’t provide context.

✕

Terms of use

I agree to Capgemini collecting and processing my personal data to allow me to receive information on Capgemini services. For further information, please see our [Privacy Notice](#).

Accept

Decline

✔ Do

Use clear, short headlines, short body text and buttons that are self explanatory.

Accessibility

All modal functionality must be available via keyboard alone.

- `Esc` should close the modal (unless it's a non dismissible modal).
- `Tab` and `Shift + Tab` should cycle through focusable elements within the modal.
- Use `role="dialog"` for regular modals, or `role="alertdialog"` for urgent, attention-required messages.
- Add `aria-modal="true"` to prevent screen reader users from interacting with background content.

SEO

- Important modal content must be available at an indexable, shareable URL. This is especially important for things like terms and conditions.
