

Share

Provide ways to share content.

Overview Specs Guidelines

Usage

Use the share component when you want to enable file download from a page. If downloadable content is related to an article page, the preamble component or the share article component should be used.

We believe the future is built today by turning innovation, technology, and collaboration into real change that drives growth and sustainability

Jean-Michel Baligand-Outters
Press relations officer

Share menu item content

Items in the share menu must have the correct label with the type of share option and its associated [icon](#).

Accessibility

- When the share menu opens, focus should move to the first item in the menu.
- Use `aria-haspopup="menu"` on the main button.
- Apply `role="menu"` and `role="menuitem"` for the mini-menu structure.
