Figma component	 Open in Figma
Status	Healthy

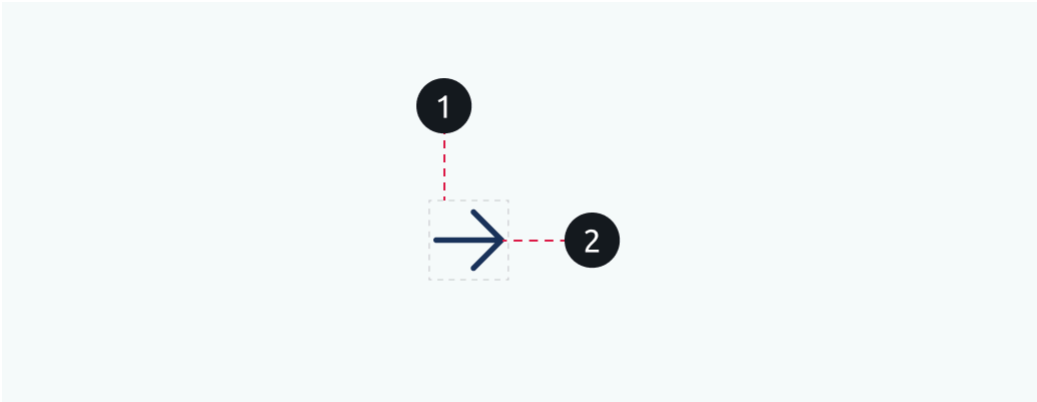

An arrow button is placed on a clickable area to indicate that the element is interactive. Use the arrow button on components that link to other pages or subpages.

The arrow button is used when:

- A larger area is clickable, for example in cards.
- Where precise alignment of the icon and text is important.

Anatomy

- Light mode
- Dark mode

1. **Container:** Transparent container that houses the arrow icon.
2. **Arrow icon.**

Behavior

The arrow button lengthens slightly when hovered over and pressed. This gives the user a visual cue that it is an interactive element.
