

Author

Display the writer(s) of an article.

Figma component

 Open in Figma

Status

Healthy

The author component is used to display the author(s) of an article. Including an author to content provides clear attribution, builds trust, and offers context about the source.

3

1. **Avatar:** Displays the author’s image. Supports single or multiple avatars when an article has multiple authors.
2. **Name:** Always visible; it shows the author’s name(s).
3. **Additional information** (optional): Depending on the variant, it can include:
 - Publication date: Indicates when the article was published.
 - Reading time: Helps readers estimate effort.
 - Role: Provides context about the author’s expertise.
 - Company: Adds credibility by showing affiliation.

Variants

There are three main variants of the Author.

Single author

Jean-Michel Baligand-Outters

Jan 31, 2025

⌚ 3 min reading

Used when an article has one author. Displays avatar and name. Can include up to two additional attributes: publication date, reading time, role, or company. It has a maximum of three text rows.

Brand

If content does not have a single clear author, but is rather general branded content, the brand author can be used. Always display the full name of the brand. Can include the publication date and reading time, and has a maximum of three text rows.

Multiple authors

On a card

When an article has multiple authors, the multi-author variant is used.

Together with our clients we transform ambition into lasting and sustainable impact

Shaping ideas into reality

Partnering with clients to design and deliver solutions that create real value and lasting impact

Jean-Michel Baligand-Outters
Jan 31, 2025 →

Author card with multiple authors.

On article pages

On the article page itself, when an article has multiple authors, the **Type=Brand** variant is placed at the top of the article. This variant should always be used in conjunction with the **Multi author composition**, which displays all the authors in a list. The multi-author composition is always placed at the bottom of the page. This ensures that both at the beginning and the end of the page, the author(s) are accredited.

At Capgemini, “Make it Real” is more than a promise, it’s how we work. We help clients move from vision to execution by blending strategic insight, technological expertise, and creative problem-solving. Our teams partner with organizations across industries to design and deliver solutions that drive measurable results, whether through digital transformation, customer experience, operational efficiency, or sustainability initiatives. By uniting innovation with responsibility, we enable businesses not only to adapt to change but to lead it, making progress real, scalable, and future-ready.
