

Media button

Control audio and video playback.

Figma component	 Open in Figma
Status	Healthy

Also known as: Video button, Audio button, Play/Pause button

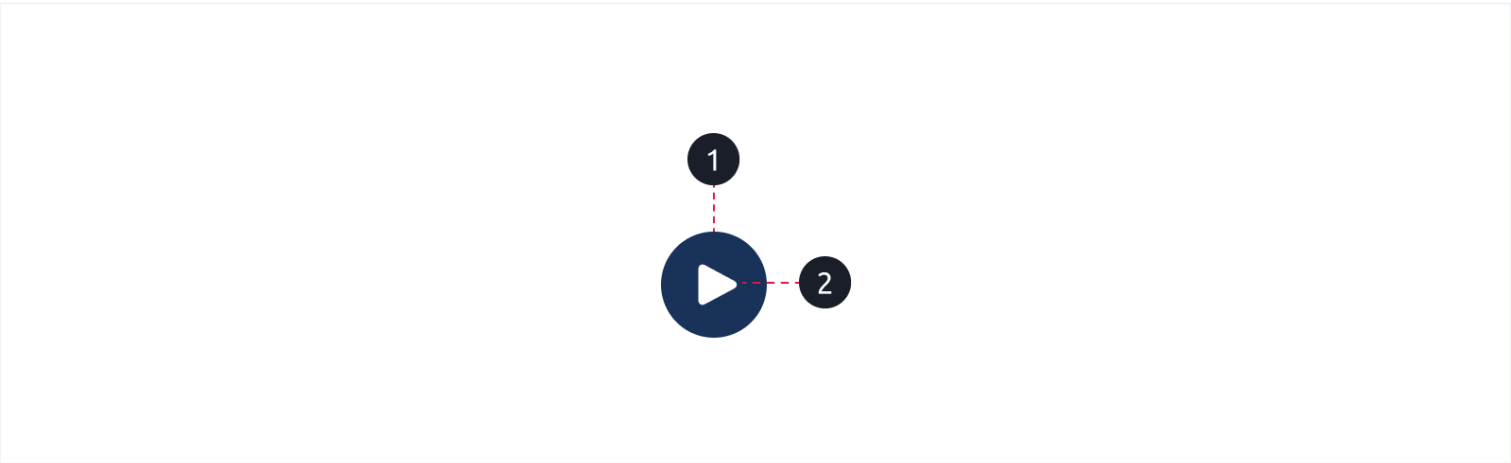

The Media button is a specialized icon button used to interact with audio and video content. It triggers actions such as:

- Play / Pause
- Mute / Unmute
- Speed adjustment
- Item switching (e.g. next episode or track)

Use the Media button in components related to podcasts, video players and audio players.

Use the [Media preview button](#) for video previews, which has a progress circle that visually indicates the remaining preview time.

Anatomy

1. **Icon:** Displays the action.
2. **Container.**

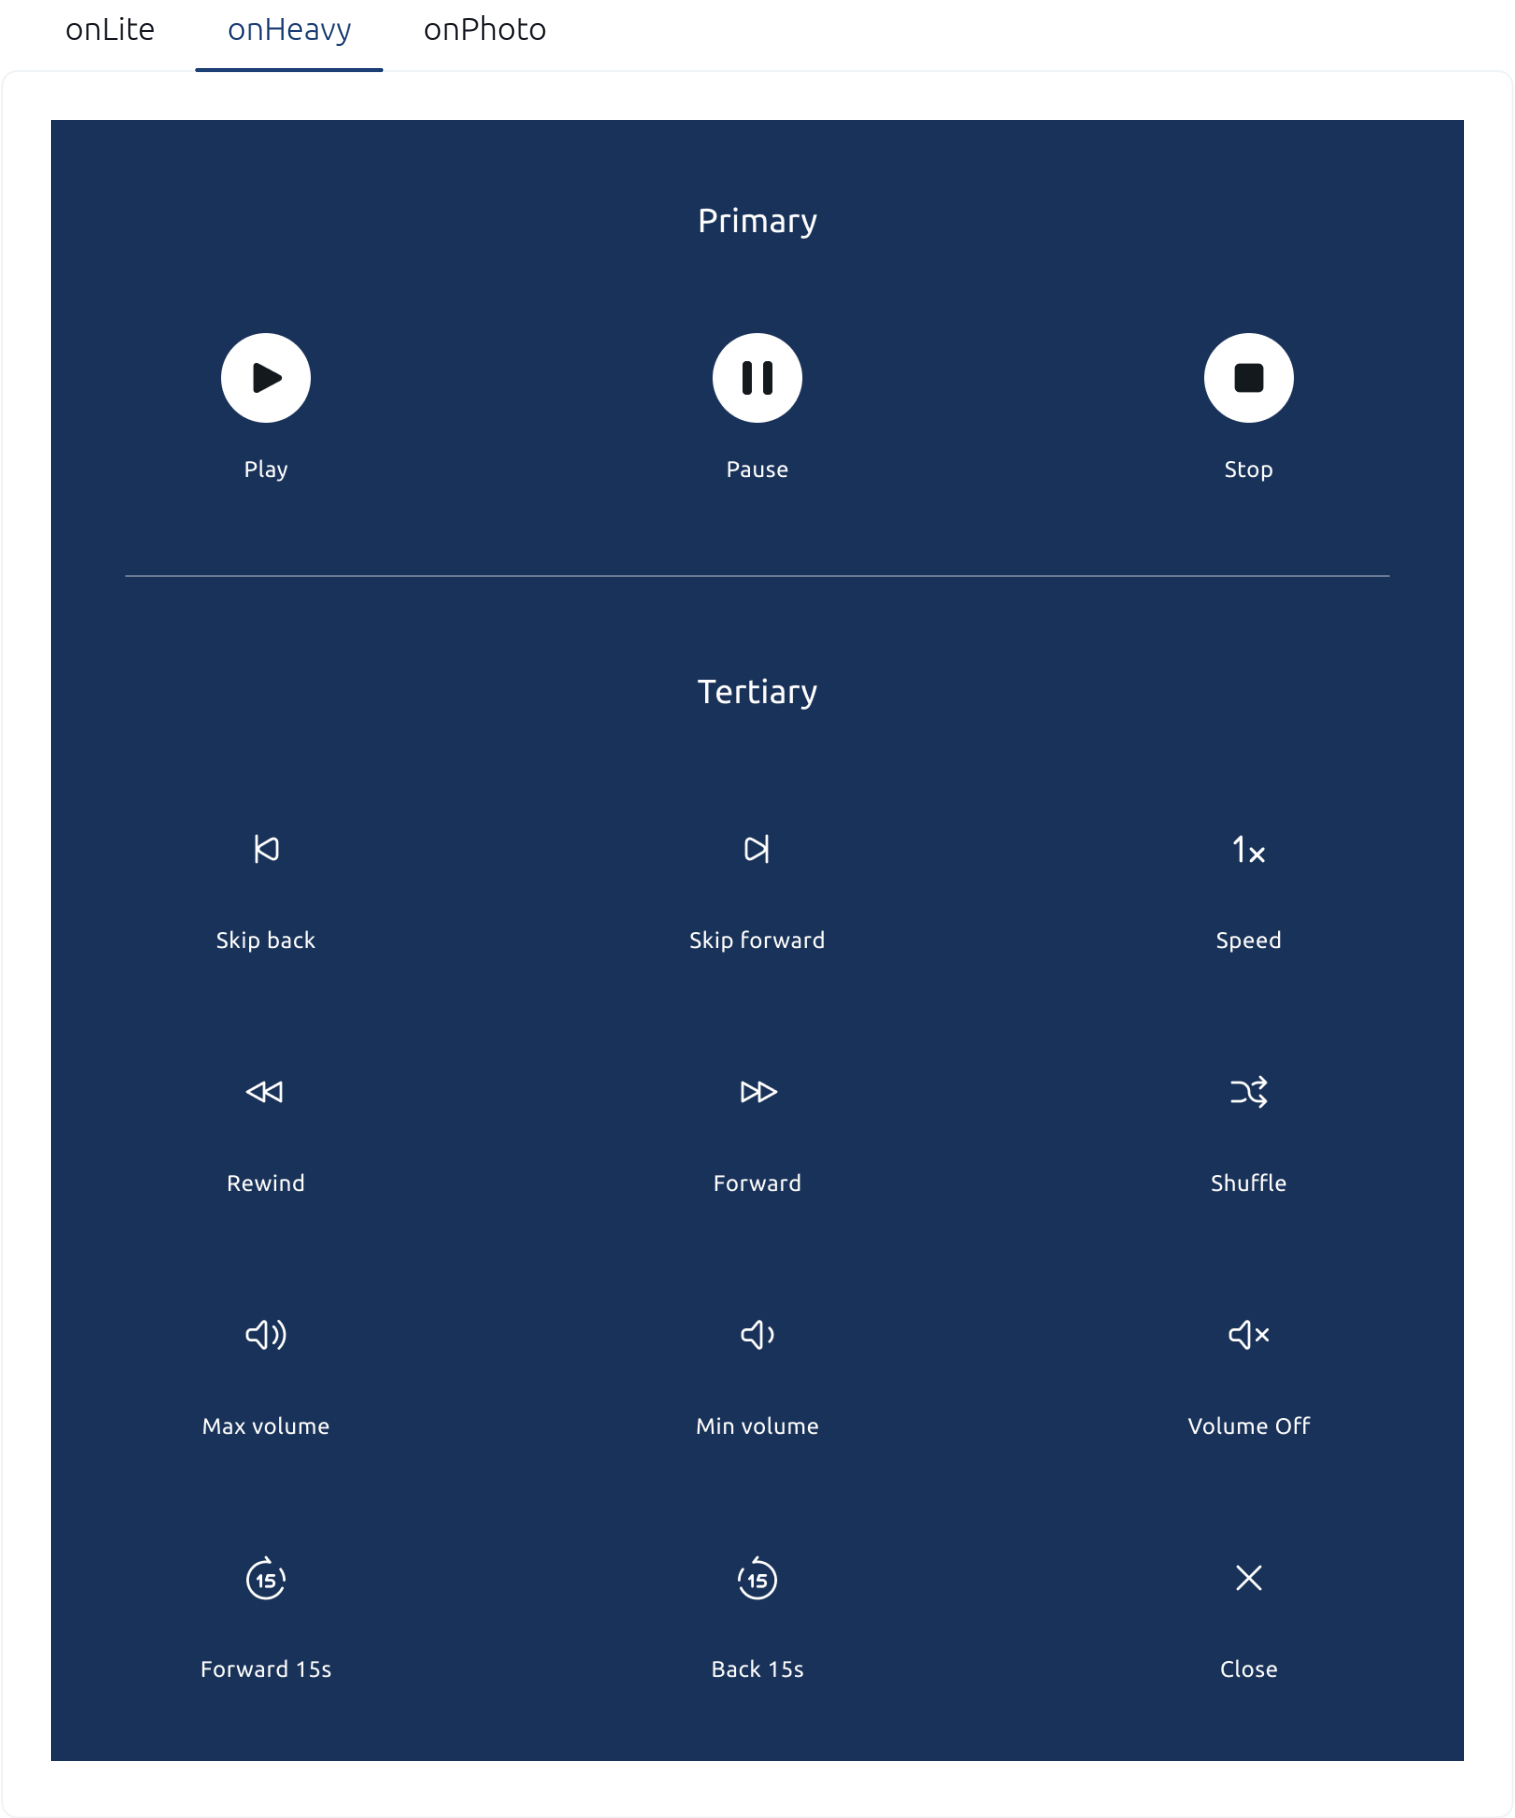

Overview

Specs

Media buttons come in three visual variants to ensure optimal contrast across different backgrounds.

- **onLight** is used when the button is placed on light backgrounds.
- **onHeavy** is used when the button is placed on dark or bold backgrounds.

- **onPhoto** is used when the button is placed over video or image content.

- **Play:** Starts playing video or audio.
- **Pause:** Pauses video or audio playback.
- **Stop:** Stops playback completely.
- **Skip back:** Skips to the previous track or section.
- **Skip forward:** Skips to the next track or section.
- **Speed:** Adjusts playback speed.
- **Rewind:** Moves backward within the current track or video.
- **Forward:** Moves forward within the current track or video.
- **Shuffle:** Plays tracks in random order.
- **Max volume:** Sets volume to the maximum level.
- **Min volume:** Sets volume to the minimum level.
- **Volume Off:** Mutes all audio.
- **Forward 15s:** Jumps forward by 15 seconds.
- **Back 15s:** Jumps backward by 15 seconds.

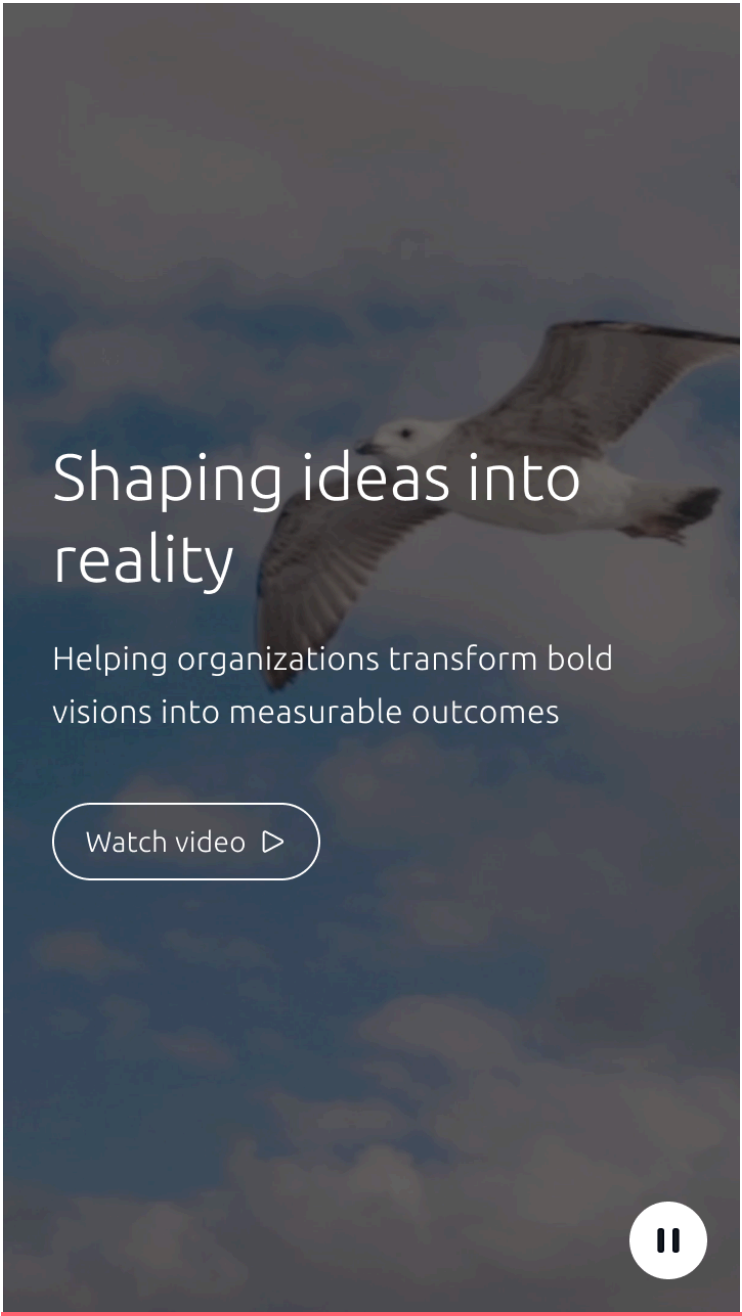

- **Close:** Closes the media player or preview.

Video previews

For auto-playing video previews, we use the [Media preview button](#). This variant has a larger target size and a progress circle that visually indicates the remaining preview time, helping users understand the duration at a glance.

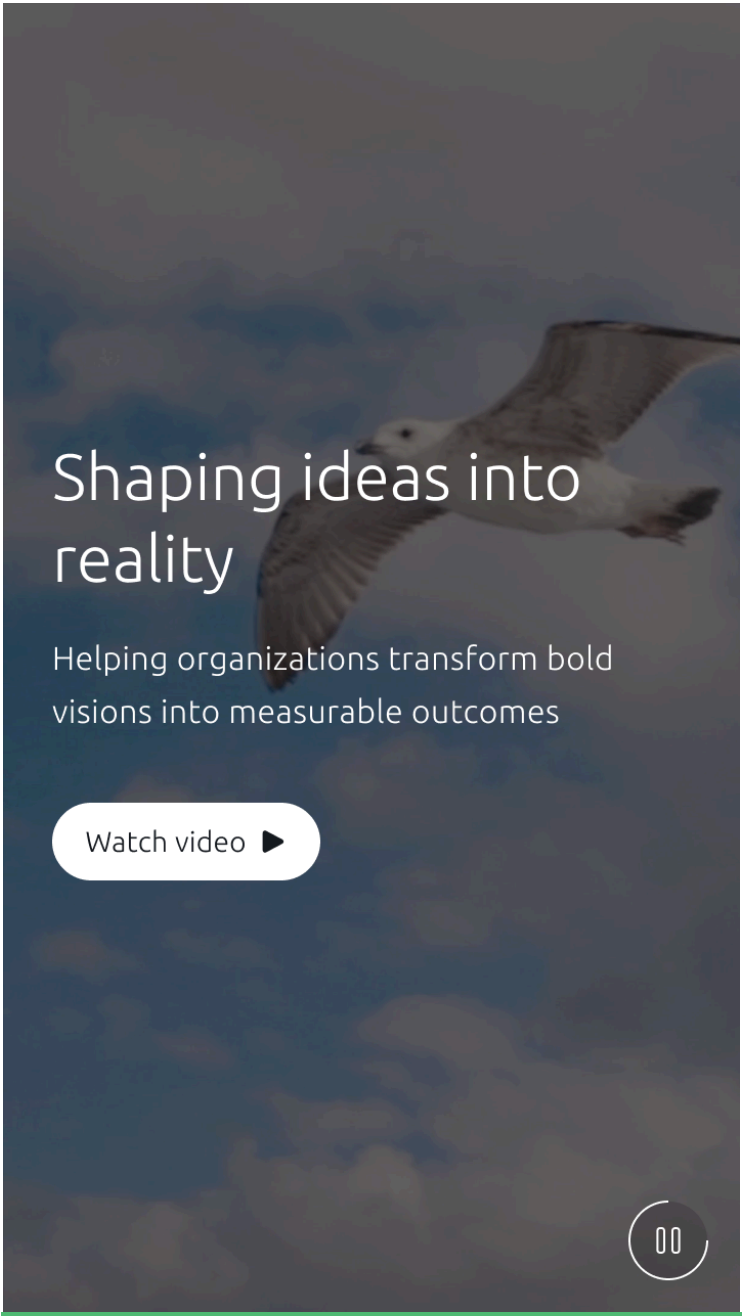

Hierarchy

The Play, Pause and Stop buttons are primary buttons, as they are the most important media buttons. Other actions, like increasing volume, have the same styling as other tertiary buttons, as they are less important, supplemental actions.

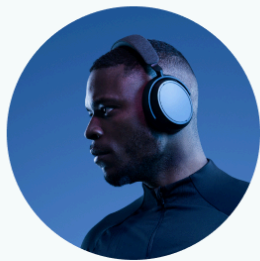

⊗ Don't

Don't use the Media button video previews.

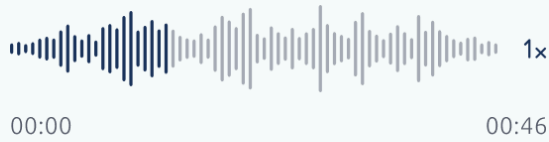

☑ Do

Use the Media preview button for secondary actions, like pausing a video preview.

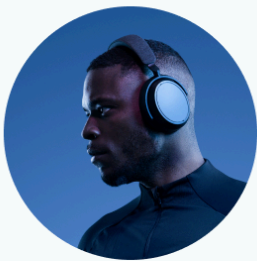

Listen to Jonathan Smith Solution architect

Client story

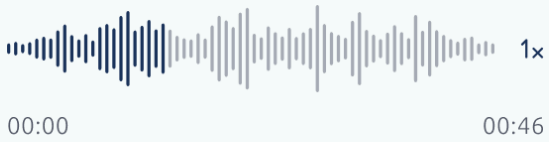

⊗ Don't

Don't make supplementary actions, like skipping through audio, a primary action.

Client story

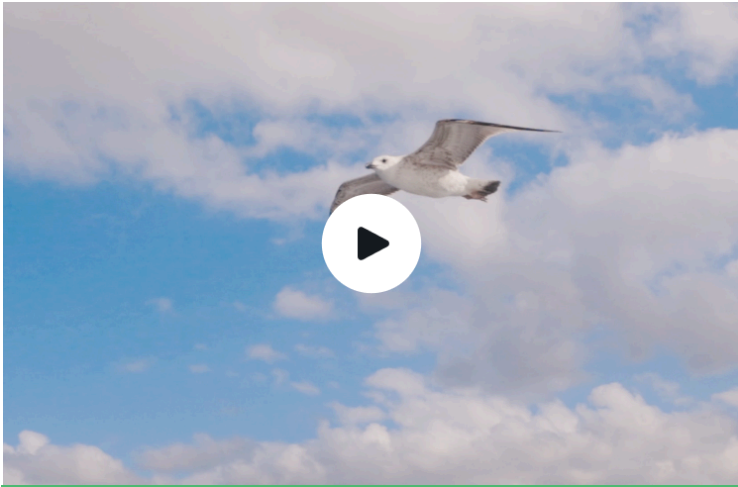

☑ Do

Use primary buttons for the most important action, like playing or pausing audio. Use the tertiary buttons for supplementary actions.

⊗ Don't

Don't use the secondary variant of the Play, Pause and Stop button as the primary action on a video that is not a preview.

☑ Do

Use the primary buttons with filled icons for the most important actions on a video.
