Figma component	 Open in Figma
Status	Healthy

Menu buttons are ideal for compact spaces, like mobile layouts or dropdowns. They allow multiple actions to be grouped together without cluttering the screen.

Anatomy

The menu button consists of a label and a chevron icon. When clicked, the chevron rotates 180 degrees to indicate the menu's expanded or collapsed state.

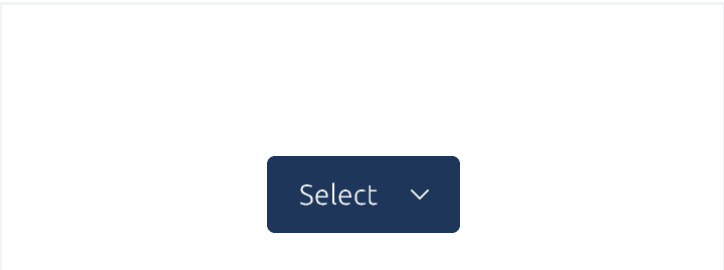

Menu button anatomy in its default and expanded state.

- Button label:** Describes what type of options will appear when the menu is opened.
- Chevron icon:** Indicates that the menu can be expanded or collapsed. It rotates 180 degrees when the menu is toggled.
- Mini menu:** Appears when the menu button is clicked and displays a list of selectable options.

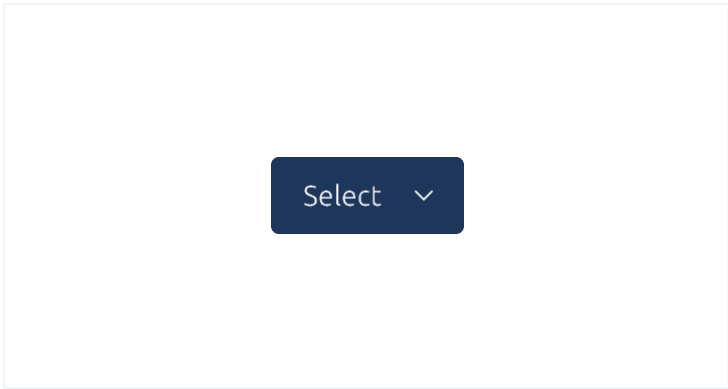

Variants

The menu button has three variants: primary, secondary and tertiary. Choose a variant which best suits the importance of the actions in the menu.

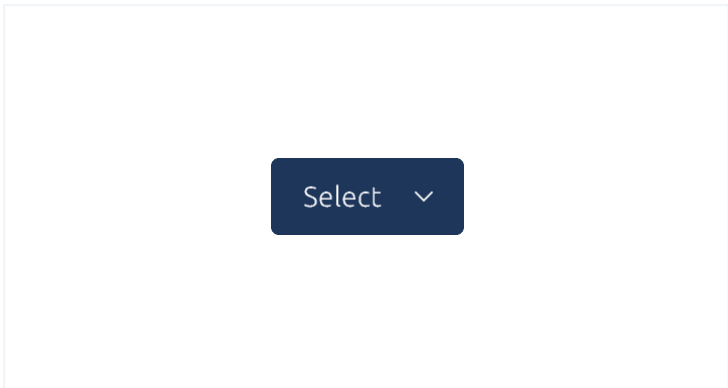

Primary

Primary menu buttons are used at most once per view or section to guide users toward the main action.

Secondary

Utilize secondary buttons for actions that are important, but not the main focus.

Tertiary

Reserve tertiary buttons for less frequently used options, like settings.
