Anatomy

- Light mode
- Dark mode

1. **Headline**
2. **Body text**
3. **[Input field\(s\)](#)** (optional): This can be a text input, radio buttons or checkboxes.
4. **[Checkbox](#)** (optional): Generally used for terms and conditions, becomes mandatory when personal information is collected within the modal.
5. **[Button](#)** (optional): Depending on the variant, the modal can have one or more buttons.
6. **Close button** (optional): When there is no close button, the user cannot dismiss the modal themselves.

Variants

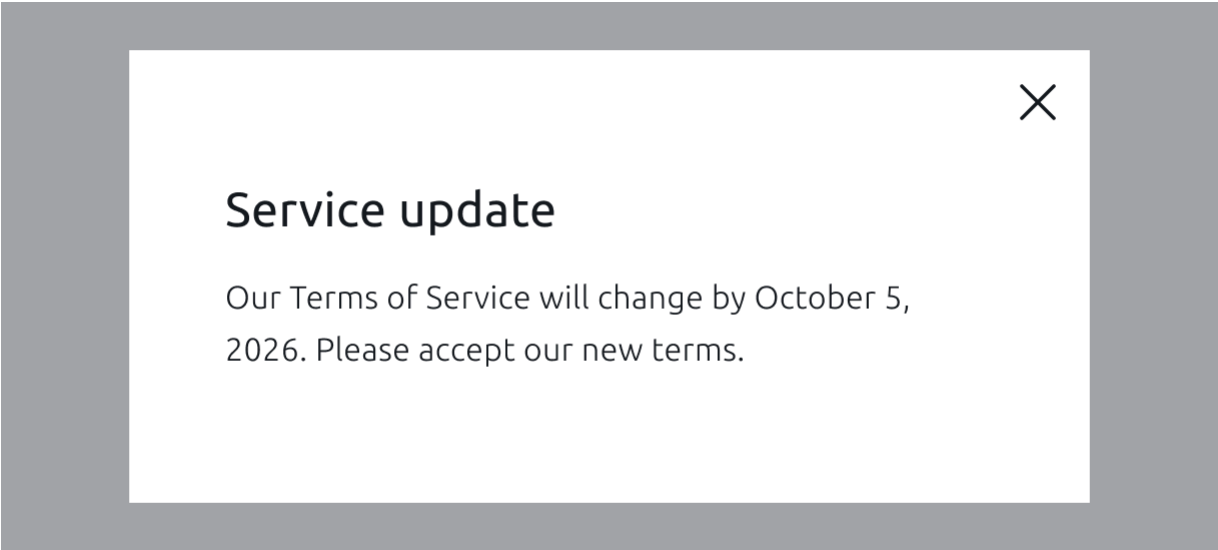

Dismissible

All variants can be either dismissible (with a close button), or non-dismissible (without a close button).

A dismissible modal can be exited either through the close button or by selecting the background area. Non-dismissible modals intentionally exclude a close button, generally forcing the user to make a required selection before continuing.

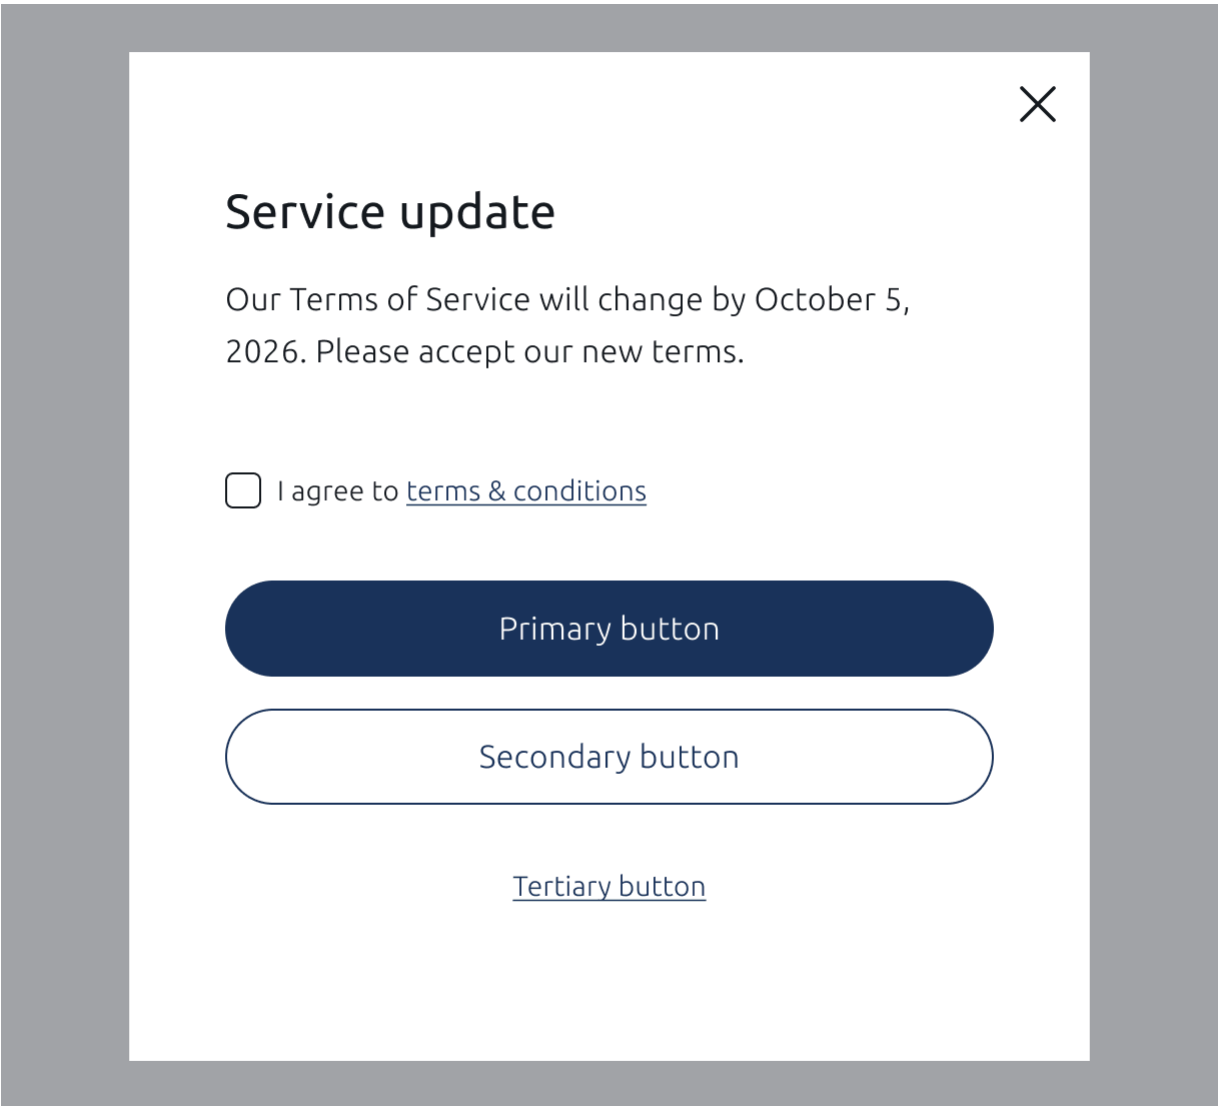

Informative

This modal can be used when the modal is strictly informative, and no button is needed. The close button is optional.

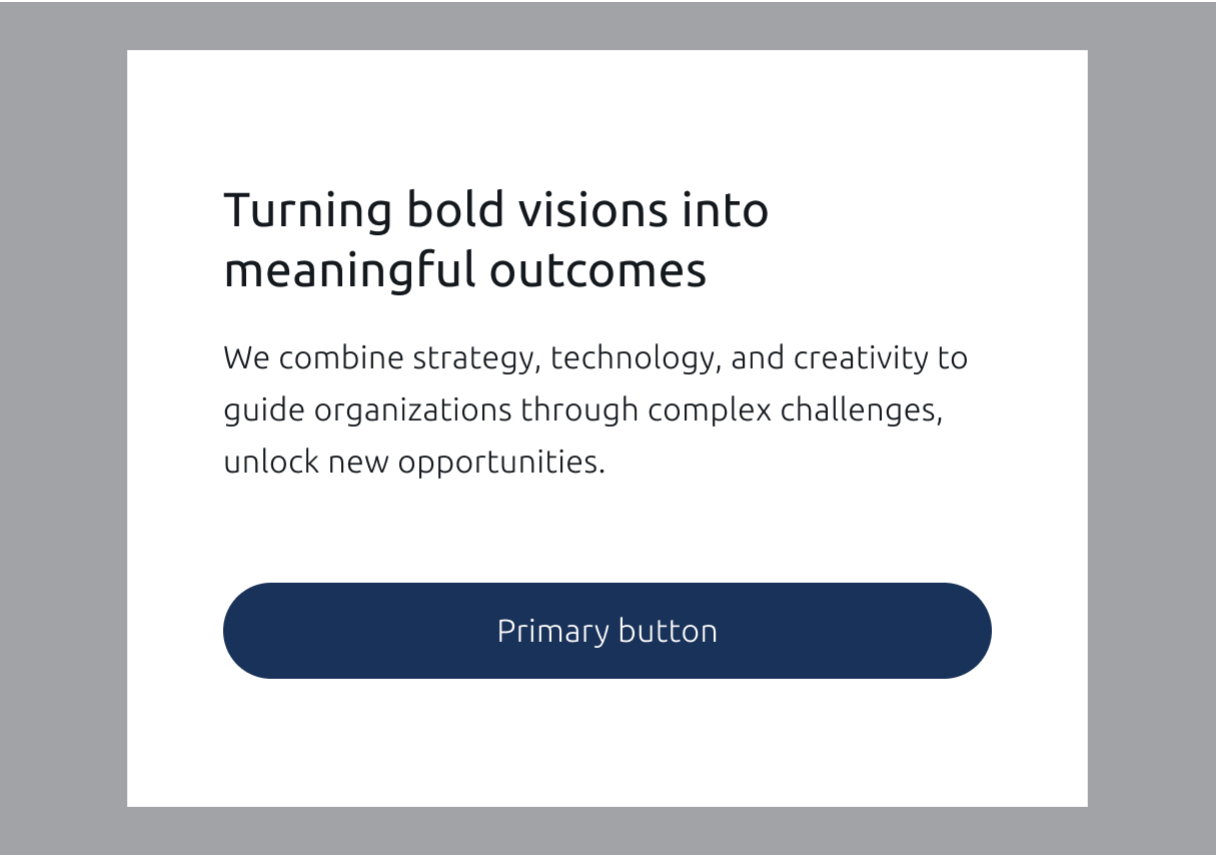

Informative with buttons

The checkbox, secondary and tertiary buttons are all optional. The close button is also optional.

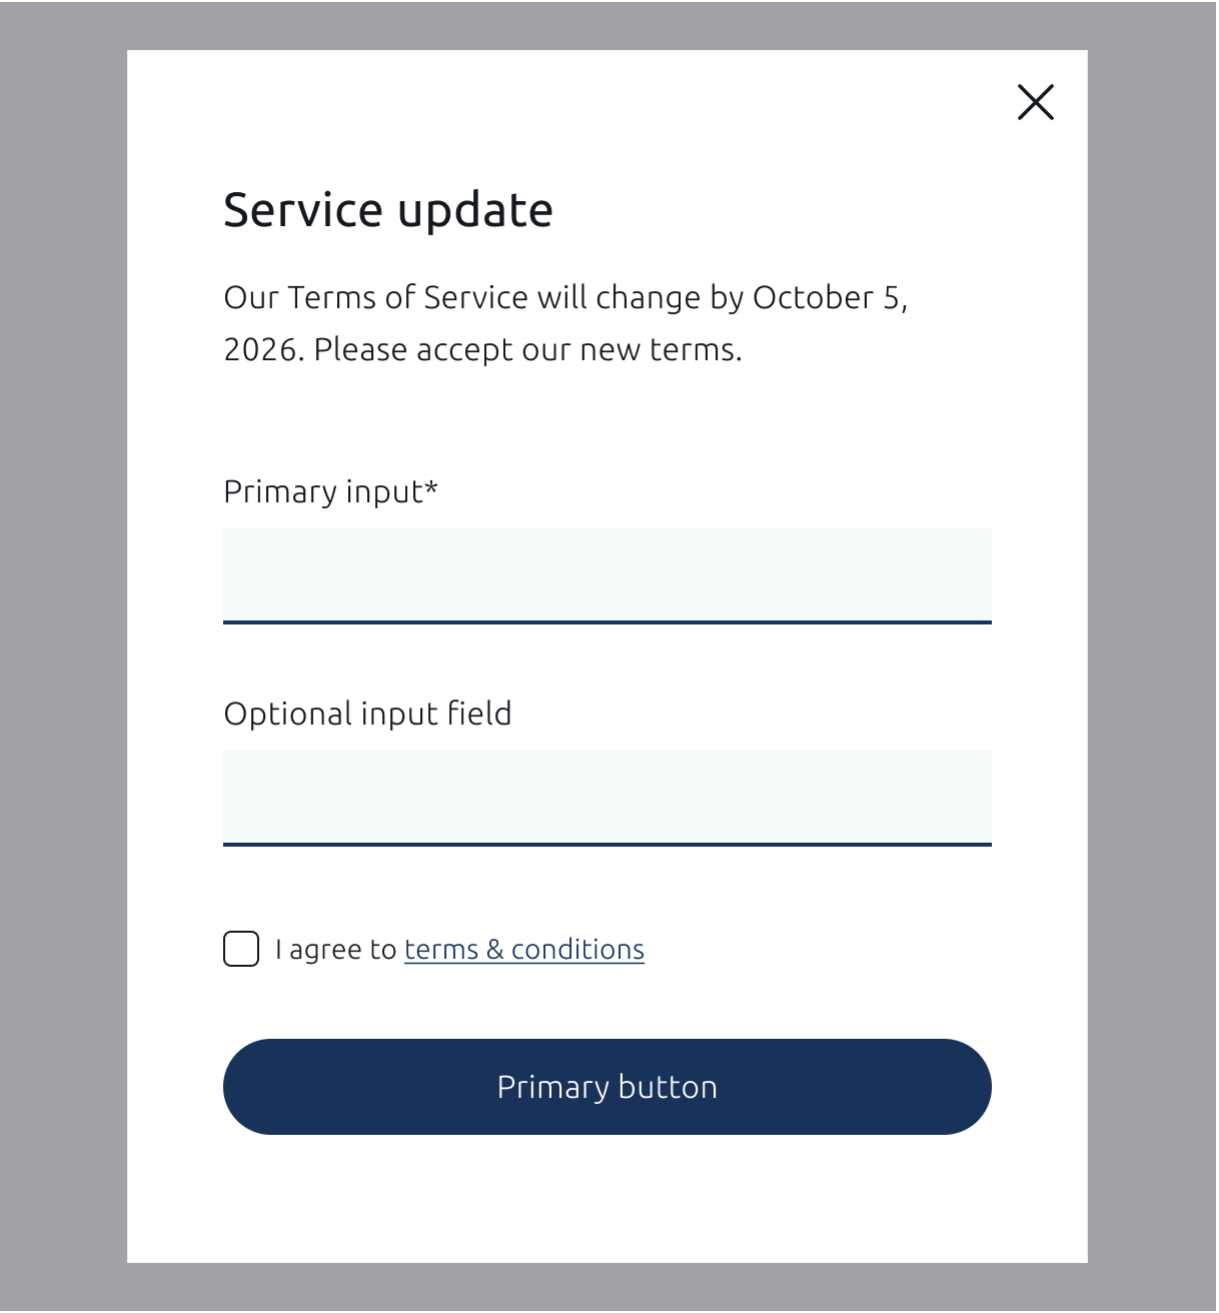

Informative modal with checkbox and additional buttons.

Modal without checkbox or additional buttons.

Input fields

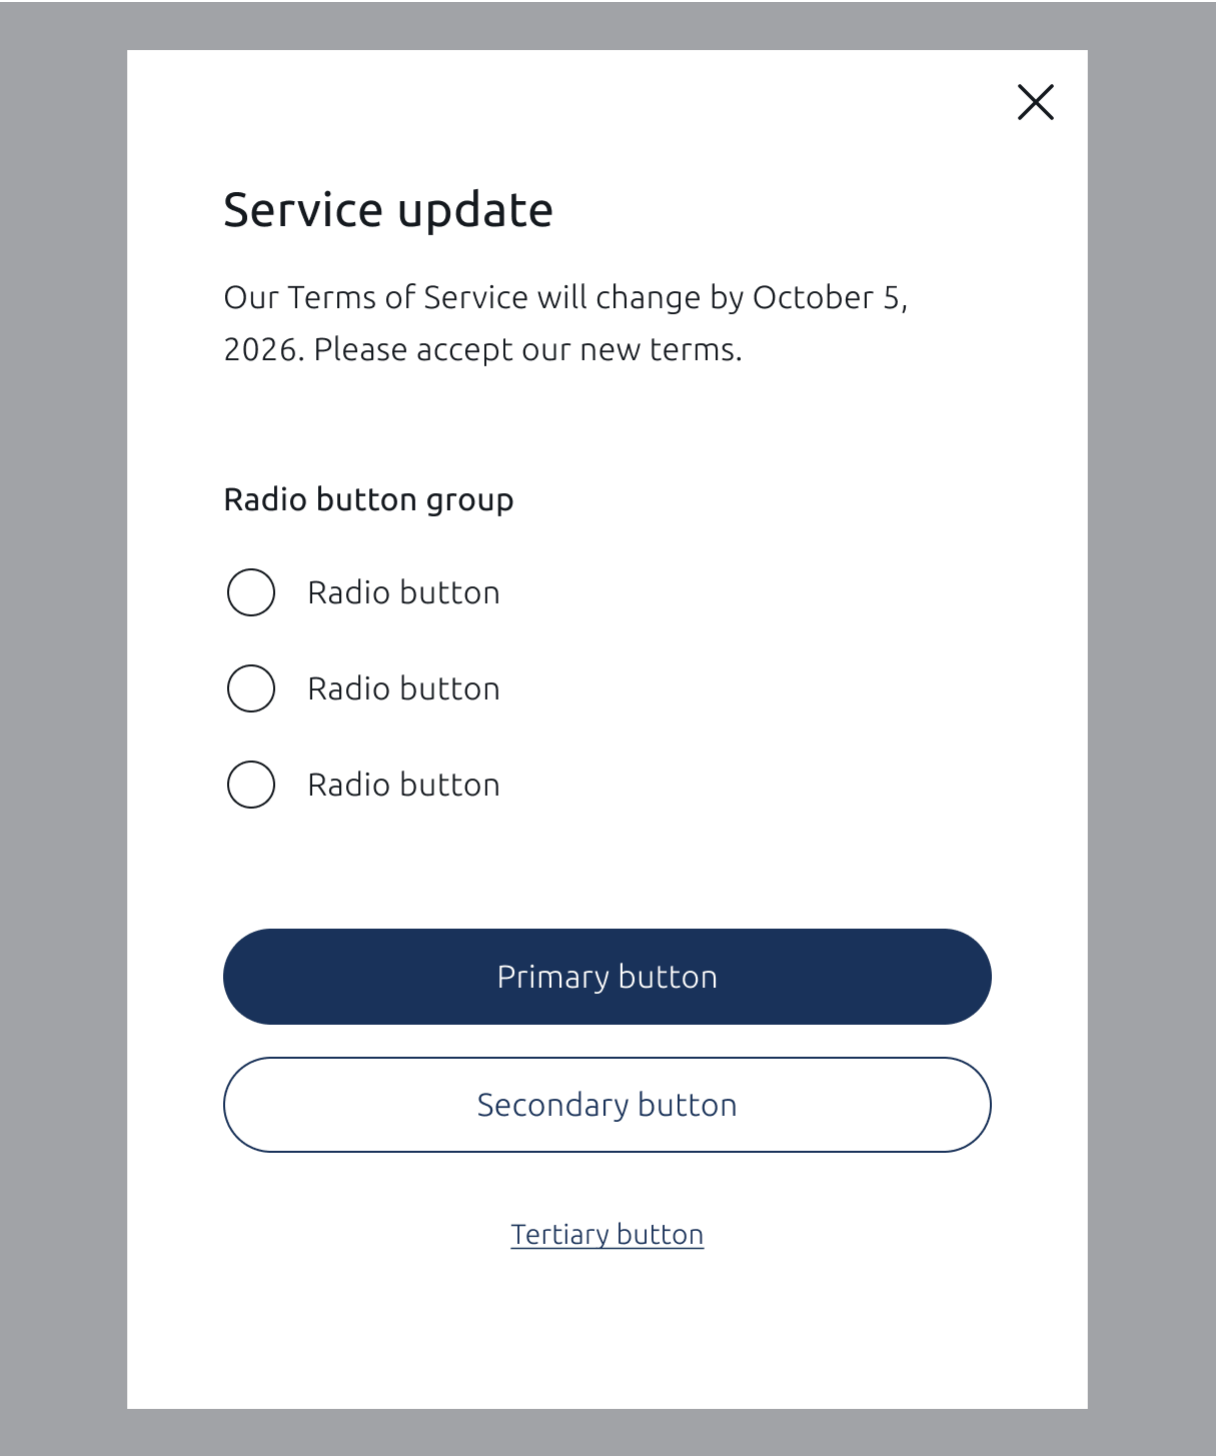

The modal can also include input fields. The second input field and the checkbox, as well as the close button, are optional.

Modal with input field

With radio buttons

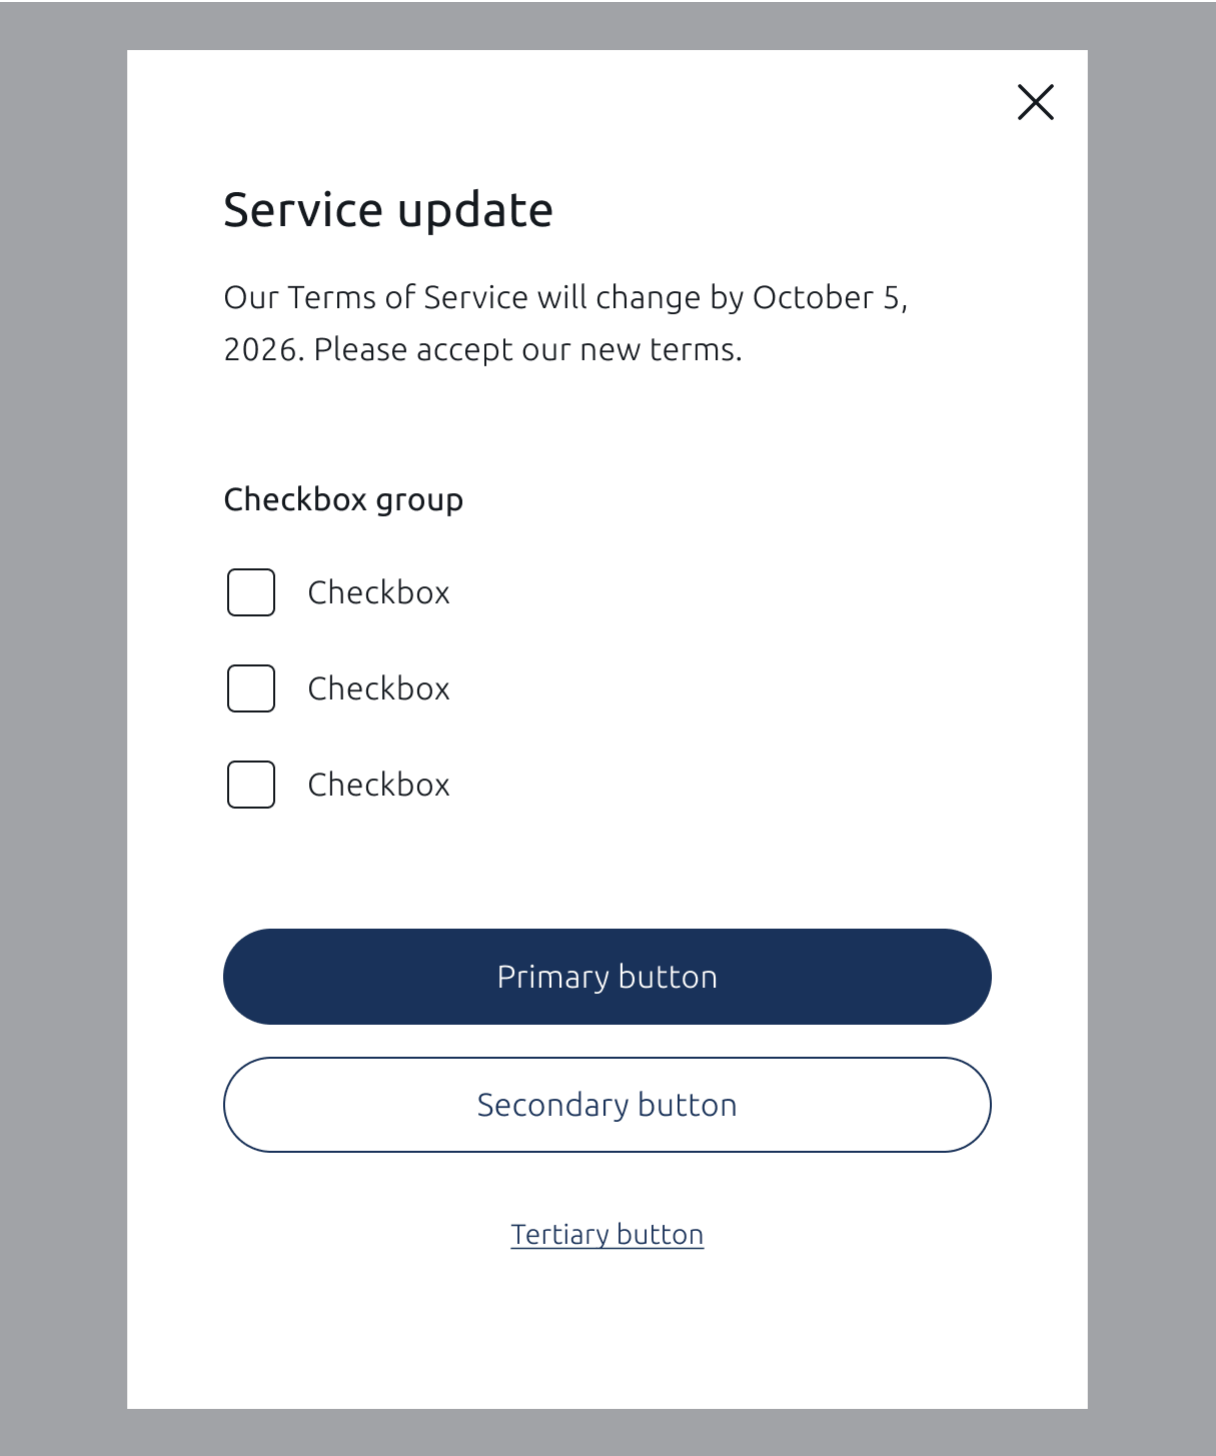

The modal can include a group of radio buttons. The secondary and tertiary buttons, as well as the close button, are optional.

Modal with radio button group

With checkboxes

The modal can include a group of checkboxes. The secondary and tertiary buttons, as well as the close button, are optional.

Behavior

Desktop

For desktop viewports, the modal appears centered with an `overlay-page-overlay` applied to dim the background and keep focus on the modal.

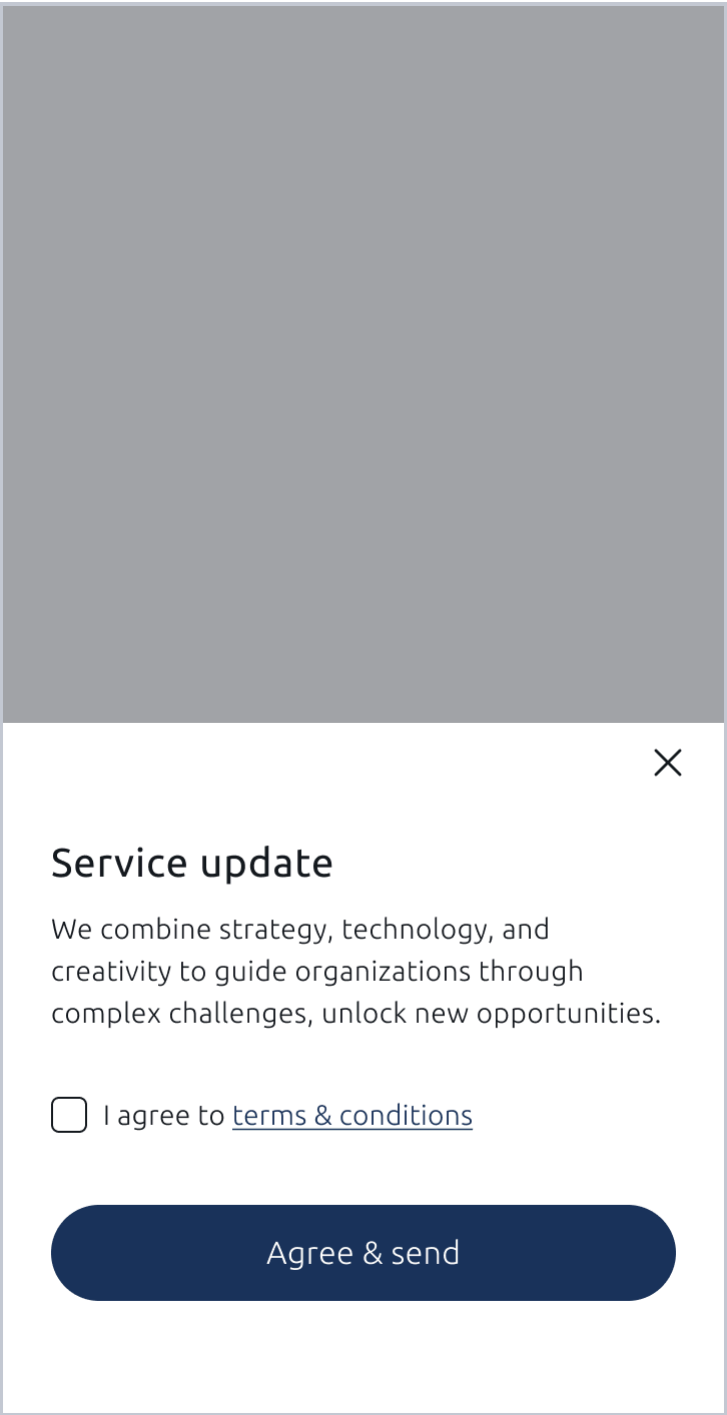

Modal on desktop.

Mobile and tablet

For screens mobile and tablet viewports, the modal appears at the bottom of the screen, using the full width of the current viewport. To dim the background, the `overlay-page-overlay` token is applied, which keeps focus on the modal.

Appearance will be animated upon both activation and dismissal.

Modal on mobile.
