

Radius

Soften edges of components.

Radius tokens are used to round corners of images, buttons, and other elements. We use radii sparingly across our components to maintain a clean design. Each Zodiac component comes with predefined radii, which should be preserved to ensure consistency.

Large radius token applied to a button

Style

There are four radius tokens.

XS
4px radius

S
16px radius

M
32px radius

L
999px radius
