

Shadows

Create depth and make elements stand out.

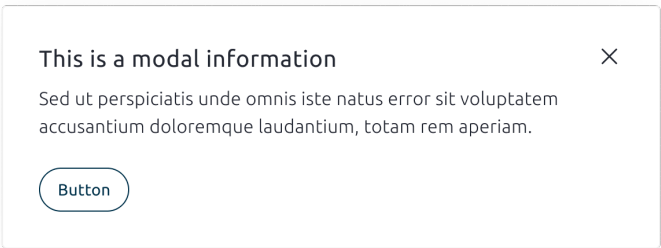

Shadows add emphasis by making elements appear elevated. We provide a single shadow option.

4px 0 70px 3px rgba(0,0,0,0.03)

Capgemini shadow

Usage

Shadows should be used sparingly and only when essential, such as when no other design solution achieves the desired clarity. Capgemini emphasizes a flat design approach, discouraging unnecessary shadows to maintain a clean, minimalist aesthetic.

⊗ Don't

Don't use shadows on modals.
