

Spacing

Give elements room with empty space.

Space tokens are used to maintain consistent spacing. They ensure sufficient margins between elements and provide necessary padding inside elements.

Spacing token applied between two buttons.

Spacing tokens used as padding inside a button.

Spacing scale

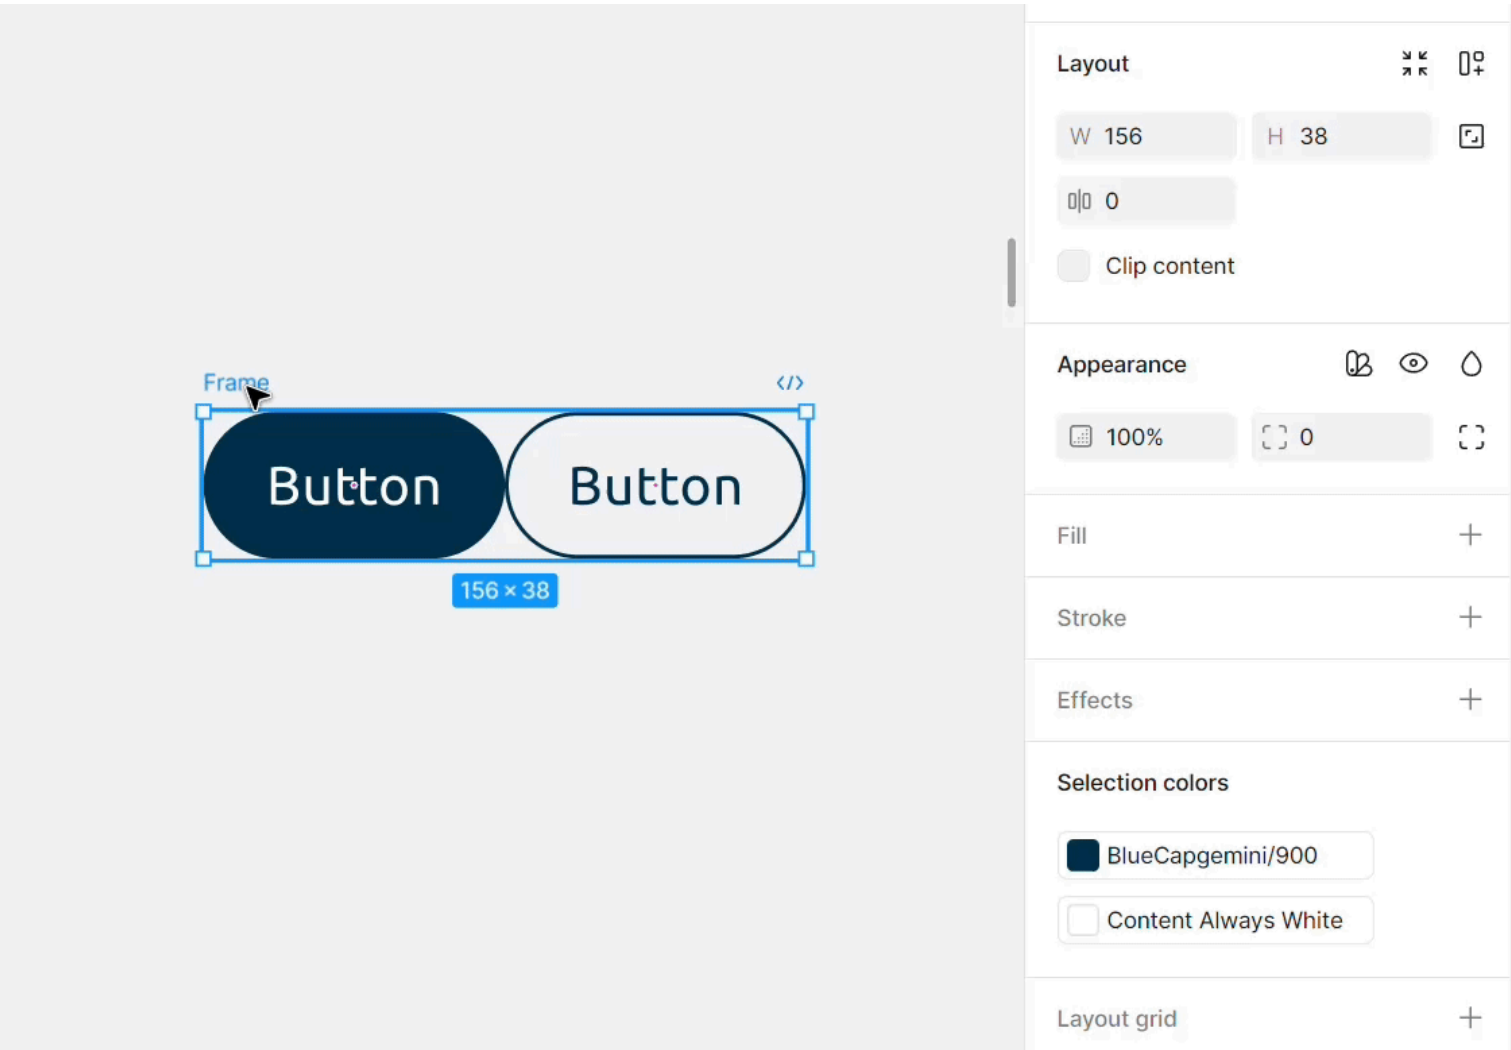

Our spacing tokens are based on a 8 pixel base unit. We provide different spacings to accommodate most use cases and screen sizes.

Token name	Value	Preview
3XS	4px	
2XS	8px	
XS	16px	
S	24px	
M	32px	
L	40px	
XL	48px	
2XL	56px	
3XL	64px	
4XL	72px	

Token name	Value	Preview
5XL	82px	
6XL	96px	
7XL	128px	
8XL	176px	

In Figma

In order to use the spacing tokens in Figma, first apply an Auto Layout to your frame. The tokens can then be applied to the component, for example as gutters and padding.
