

Author

Display the writer(s) of an article.

- Overview
- Specs
- Guidelines

Size

Size	Max width	Typography token	Avatar size	Reading time icon size
Small	340px	heading-2xs-300	M	S
Large	380px	heading-xs-300	M	S

Limitations

The author’s maximum width restricts the maximum characters that can be used per row.

Variant	Max characters per row
Single author	~ 35
Multi author	~ 20

Placement

On an article page, the Author component should appear near the [article title](#) or introduction. This ensures readers immediately see who wrote the content before engaging with it.

We believe the future is built today by turning innovation, technology, and collaboration into real change that drives growth and sustainability
