

Avatar

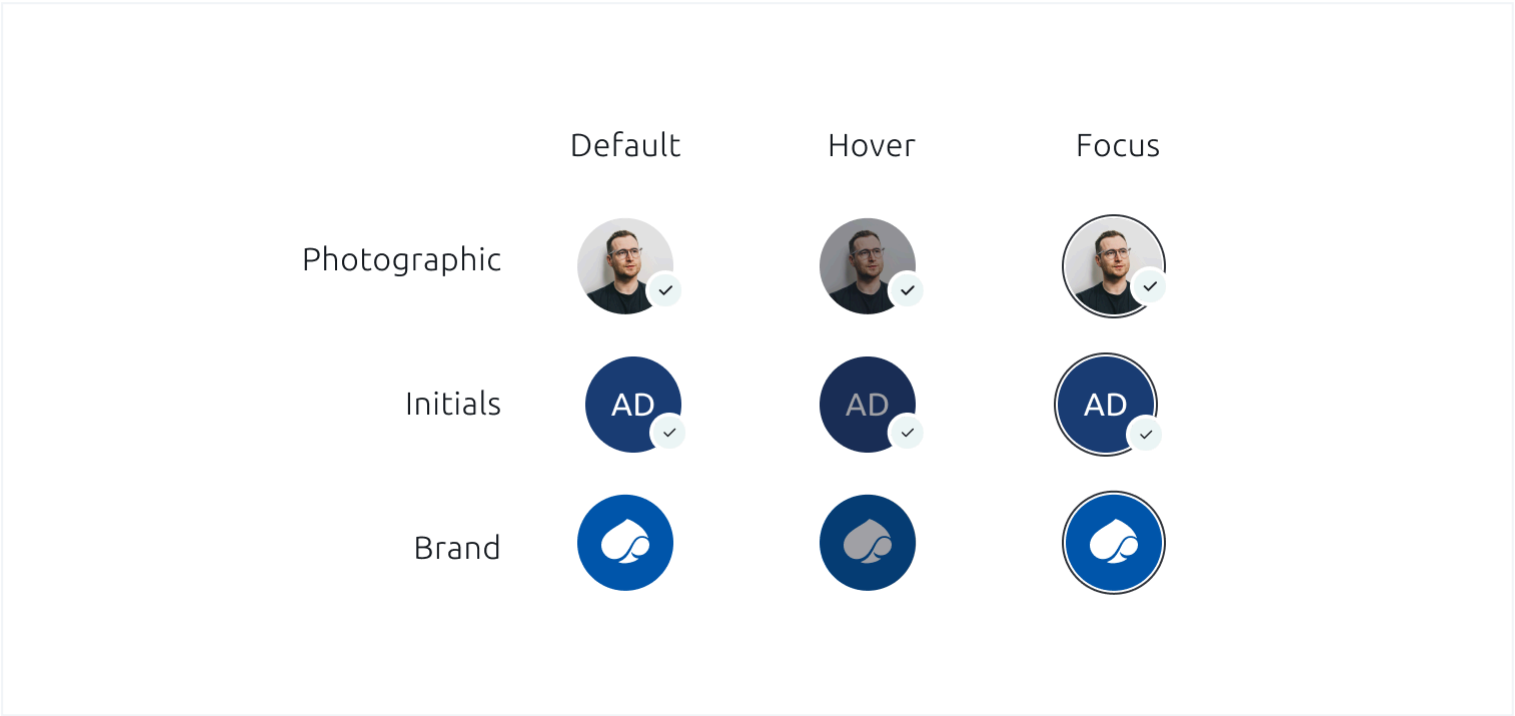

Represent a user, group, or brand.

Overview

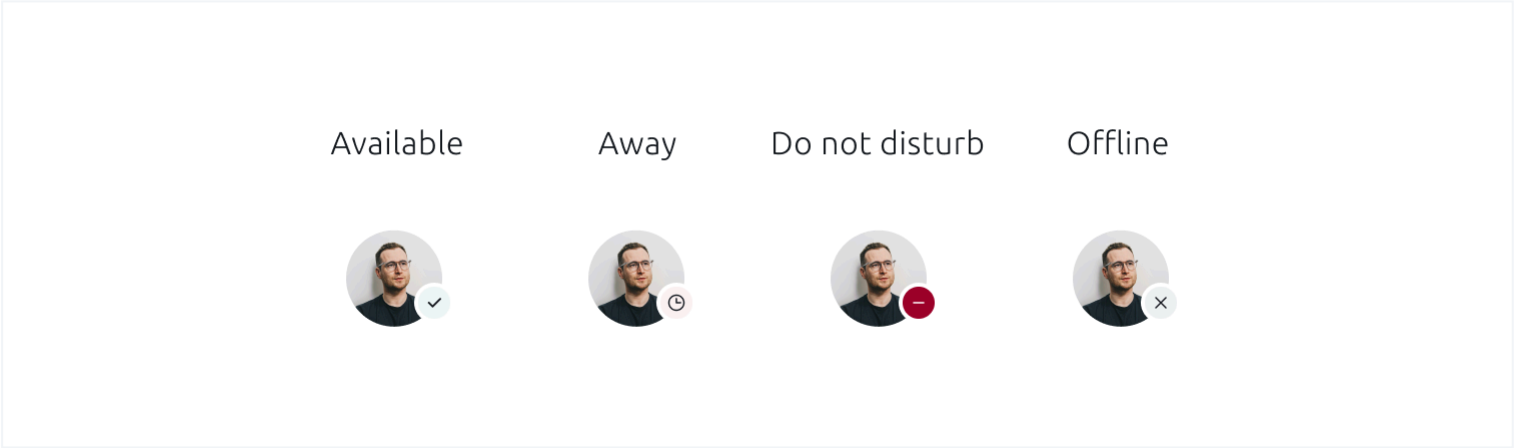

Specs

States

All variants support three interaction states: default, hover, and focus.

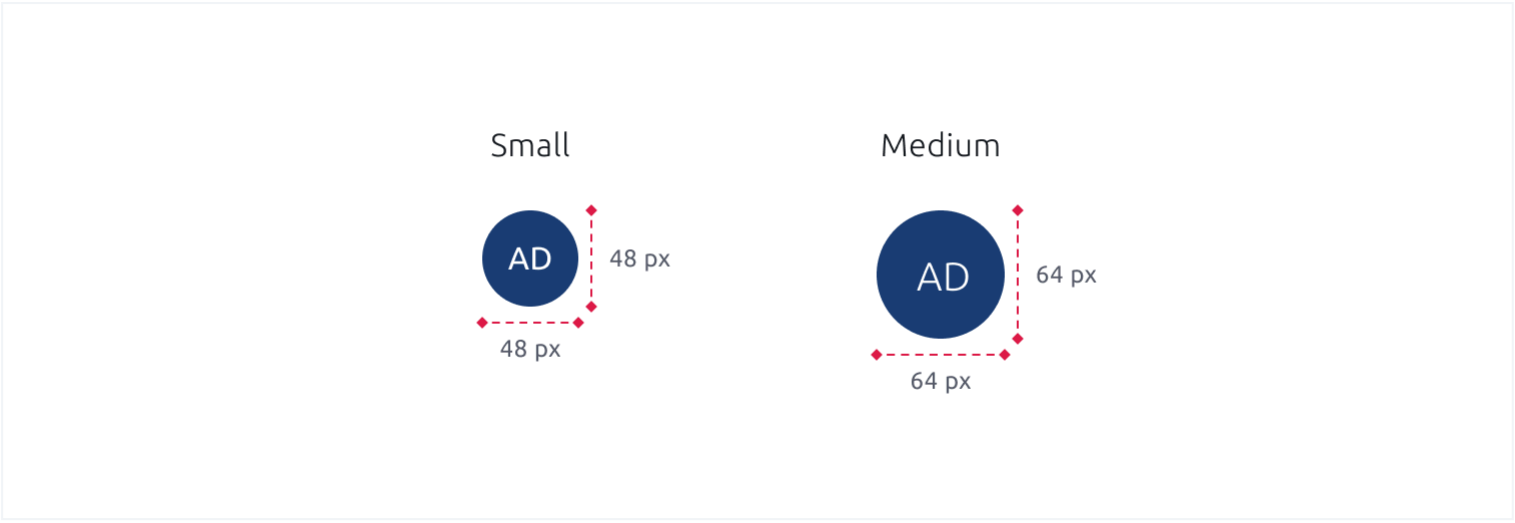

Status

1. **Available:** The user is online and available for interaction.
2. **Away:** The user is online but not currently active.
3. **Do not disturb:** The user is online but does not want to receive notifications or messages.
4. **Offline:** The user is not connected and cannot be reached.

Size

The avatar comes in two sizes: small and medium.

Size	Avatar dimensions	Initials token
Small	48×48px	<code>heading-xs-400</code>
Medium	64×64px	<code>heading-s-300</code>

Interaction

Avatars are primarily static visual elements, but they can support interaction when needed. Common interactions include opening a user profile or displaying a dropdown menu with account options. Avatars should provide clear feedback when interactive, such as a focus ring or hover state, and must remain accessible by supporting keyboard navigation and screen reader labels.

Character limit

Avatars with initials are limited to two characters.

Color

Avatar with Initials color

Avatars with initials should use the following colors for the background:

Surface Ink Heavy

Surface Marine Heavy

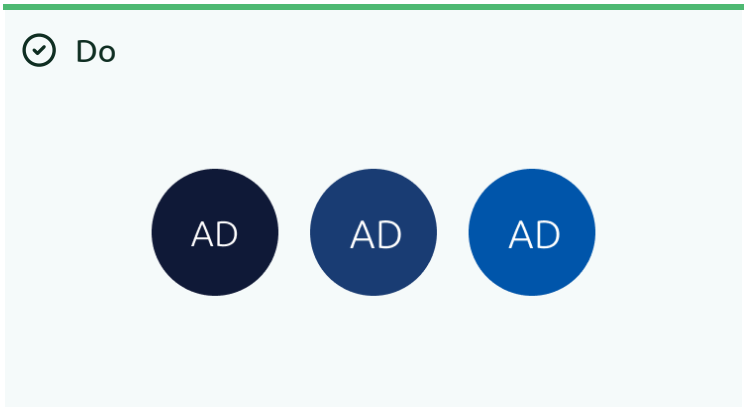

Surface Azur Heavy

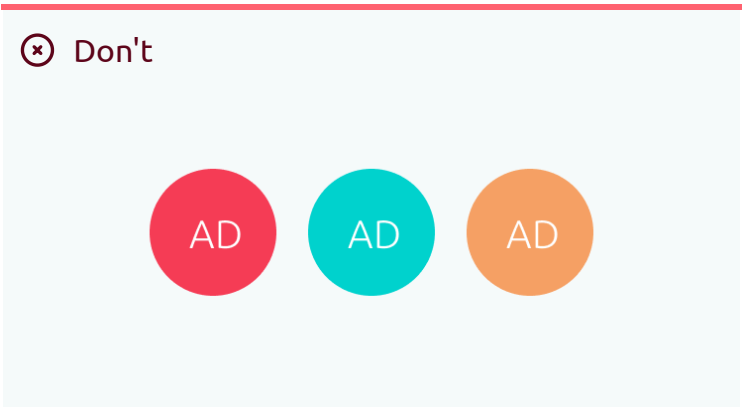

The color of the initials is `content-text-always-white` to ensure the initials are accessible in both Light and Dark mode.

  #ffffff

Text Always White

Use the predefined colors for the avatars.

Don't use other colors.

Brand avatar color

For avatars with our logo, always use the brand color for the background and `surface-always-white` for the spade.

 #0058ab

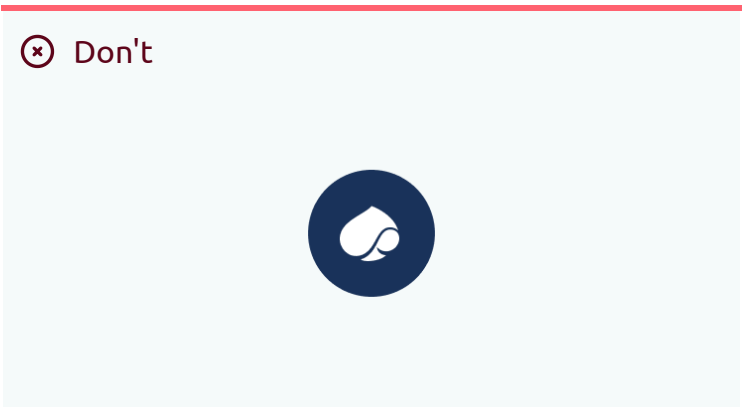

500

  #ffffff

Surface Always White

Use the default brand color for avatars with the brand logo.

Don't use other colors for avatars with the spade.

State color

Hover Focus

Hover overlay

  `rgba(0,0,0,0.15)`
