Helper Text

Disabled state

1. **Default:** The initial state before any interaction. Shows the label, magnify glass icon and search text. Chevron icon indicates the combobox can be expanded.
2. **Hover:** Triggered when the user moves the pointer over the combobox field. Visual cue (e.g., subtle background or border change) signals interactivity.
3. **Focus:** Activated when the user clicks into the field or navigates via keyboard. Highlights the field to indicate readiness for input. The menu displays a list of options. Chevron icon flips upward to indicate expanded state. User can either enter in text or scroll to select an option.
4. **Active:** Appears when the field has been selected.
5. **Filled (open menu):** Displays the list of options. Chevron icon flips upward to indicate expanded state. User can scroll or select an option.
6. **Filled (closed menu):** Occurs after the user selects an option. Selected value replaces search field text and icon. Field returns to default or focus styling, depending on interaction, and displays a close icon alongside the selected value.
7. **Error:** Indicates a validation issue (e.g., required field left empty). Shows error message and optional alert icon. The input is invalid due to an incorrect format, missing required data, or a system-level issue. This state prevents submission until corrected and requires user action. Highlights the field to indicate readiness for input to correct the error.
8. **Disabled:** The field is inactive and cannot be interacted with. It does not respond to focus or input events.

Size

Comboboxes come in two height sizes: medium and large. Supporting multiple sizes provides flexibility when designing layouts, but consistency is key: use the same size for all form components on a page. For example, if you choose a large combobox, apply the same size to text inputs, buttons, and other elements. When in doubt, default to the medium size.

Size	Usage	Height	Target height	Min width	Max width
Medium	Ideal for space-constrained layouts or long, complex forms.	40px	40px	270px	800px
Large	Best for spacious layouts, simple forms, or standalone comboboxes.	48px	48px	270px	800px

Menu size

Size	Usage	Height	Target height	Min width	Max width
Small	With medium dropdown fields.	48px	48px	-	-
Large	With large dropdown fields.	56px	56px	180px	800px

Used components sizes

These are the sizes of components that are used in the dropdown and its menu.

Element	Medium	Large
Search icon	S	M
Chevron icon	S	M
Helper icon	S	S
Check icon	M	M
Flag	16×16px	24×24px

Typography

Element	Medium	Large
Label text	heading-2xs-300	heading-xs-300
Search text	body-s-300	body-m-300
Helper text	body-xs-300	body-xs-300
Dropdown item	body-s-300	body-m-300
