States

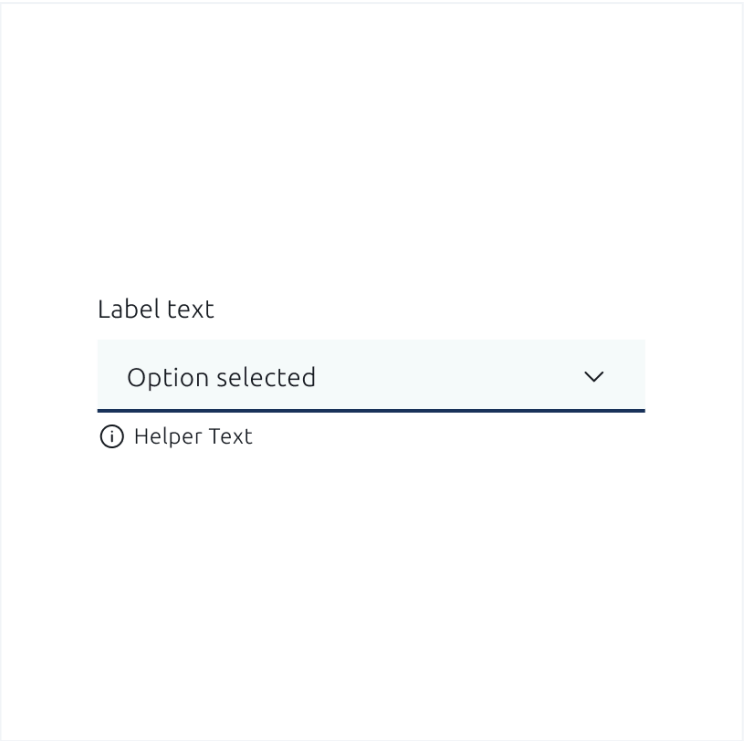

Default state

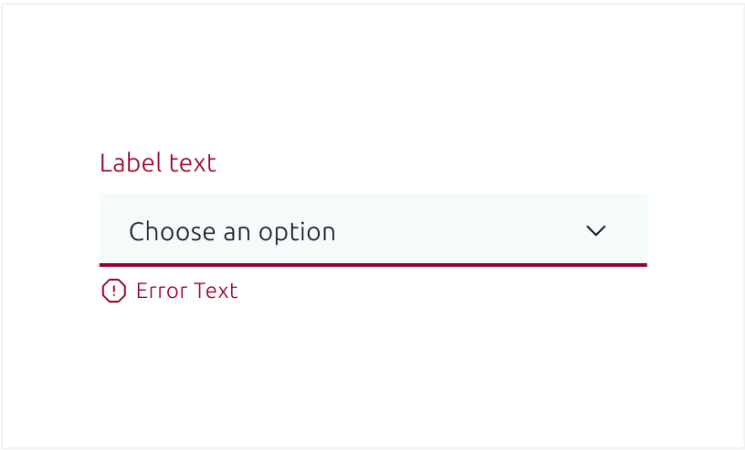

Hover state

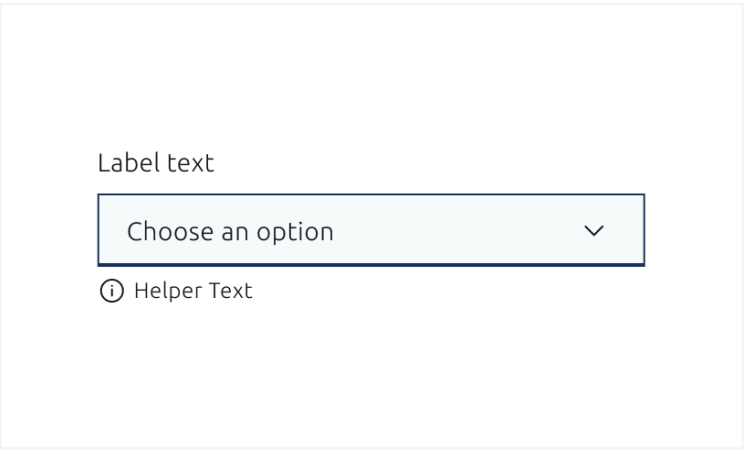

Filled state with open menu

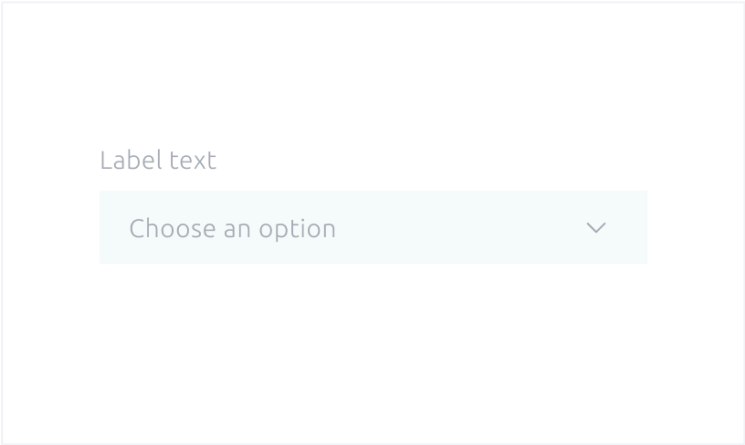

Filled state with closed menu

Error state

Focus state

Disabled state

1. **Default:** The initial state before any interaction. Shows the label and optional placeholder text. Chevron icon indicates the dropdown can be expanded.
2. **Hover:** Triggered when the user moves the pointer over the dropdown field. Visual cue (e.g., subtle background or border change) signals interactivity.
3. **Filled (open menu):** Displays the list of options. Chevron icon flips upward to indicate expanded state. User can scroll or select an option.
4. **Filled (closed menu):** Occurs after the user selects an option. Selected value replaces placeholder text. Field returns to default or focus styling, depending on interaction.
5. **Error:** Indicates a validation issue (e.g., required field left empty). Shows error message and optional alert icon. The input is invalid due to an incorrect format, missing required data, or a system-level issue. This state prevents submission until corrected and requires user action.
6. **Focus:** Activated when the user clicks into the field or navigates via keyboard. Highlights the field to indicate readiness for input.
7. **Disabled:** The field is inactive and cannot be interacted with. It does not respond to focus or input events.

Size

Dropdowns come in two height sizes: medium and large. Supporting multiple sizes provides flexibility when designing layouts, but consistency is key: use the same size for all form components on a page. For example, if you choose a large dropdown, apply the same size to text inputs, buttons, and other elements. When in doubt, default to the medium size.

Size	Usage	Height	Target height	Min width	Max width
Medium	Ideal for space-constrained layouts or long, complex forms.	40px	40px	270px	800px
Large	Best for spacious layouts, simple forms, or standalone dropdowns (e.g., filters)	48px	48px	270px	800px

Dropdown menu size

Size	Usage	Height	Target height	Min width	Max width
Small	With medium dropdown fields.	48px	48px	-	-
Large	With large dropdown fields.	56px	56px	180px	800px

Used components sizes

These are the sizes of components that are used in the combobox and its menu.

Element	Medium	Large
Chevron icon	S	M
Helper icon	S	S
Check icon	M	M

Typography

Element	Medium	Large
Label text	heading-2xs-300	heading-xs-300
Placeholder text	body-s-300	body-m-300
Helper text	body-xs-300	body-xs-300
Dropdown item	body-s-300	body-m-300
