Focus

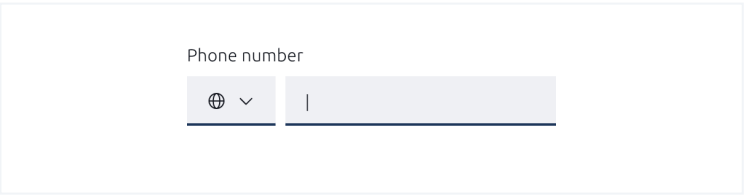

Disabled

1. **Default:** The initial state before any interaction. Shows the label, magnify glass icon and search text. Chevron icon indicates the combobox can be expanded.
2. **Hover:** Triggered when the user moves the pointer over the combobox field. Visual cue (e.g., subtle background or border change) signals interactivity.
3. **Focus (menu shown):** Activated when the user clicks into the field or navigates via keyboard. Highlights the field to indicate readiness for input. The menu displays a list of options. Chevron icon flips upward to indicate expanded state. User can either enter in text or scroll to select an option.
4. **Error:** Indicates a validation issue (e.g., required field left empty). Shows error message and optional alert icon. The input is invalid due to an incorrect format, missing required data, or a system-level issue. This state prevents submission until corrected and requires user action.
5. **Open (menu shown):** Displays the list of options. Chevron icon flips upward to indicate expanded state. User can scroll or select an option.
6. **Open 1 selected (menu shown):** Displays the list of options with one option selected. Chevron icon flips upward to indicate expanded state. User can scroll or select an option.
7. **Filled:** After an option is selected, the placeholder text is replaced by the chosen value. The field reverts to its default styling and displays a close (x) icon alongside the selected value.
8. **Disabled:** The field is inactive and cannot be interacted with. It does not respond to focus or input events.

1. **Default:** The initial state before any interaction. Shows two sections, one for the flag dropdown and the other to enter the phone number. Chevron icon indicates the flag dropdown can be expanded.
2. **Hover:** Triggered when the user moves the pointer over the phone field. Visual cue (e.g., subtle background or border change) signals interactivity.
3. **Active** Activated when the user clicks into the phone number area or navigates to it via keyboard, with the country menu still collapsed. The field shows focus styling and a text cursor, indicating the input is ready for entry while the country dropdown remains available.
4. **Filled:** After an option is selected, the placeholder text is replaced by the chosen value. The field reverts to its default styling and displays the phone number the user entered.
5. **Filled (menu shown)** The field contains a value and the country dropdown is expanded. The entered phone number remains visible while the menu shows available options.
6. **Error:** Indicates a validation issue (e.g., required field left empty). Shows error message and optional alert icon. The input is invalid due to an incorrect format, missing required data, or a system-level issue. This state prevents submission until corrected and requires user action.
7. **Focus:** Activated when the user clicks into the field or navigates via keyboard. Highlights the field to indicate readiness for input.
8. **Disabled:** The field is inactive and cannot be interacted with. It does not respond to focus or input events.

1. **Default:** The initial state before any interaction. Shows two sections, one for the country abbreviation dropdown with the generic globe icon and the other to enter the phone number. Chevron icon indicates the flag dropdown can be expanded.
2. **Hover:** Triggered when the user moves the pointer over the phone field. Visual cue (e.g., subtle background or border change) signals interactivity.
3. **Active** Activated when the user clicks into the phone number area or navigates to it via keyboard, with the country abbreviation menu still collapsed. The field shows focus styling and a text cursor, indicating the input is ready for entry while the country dropdown remains available.
4. **Filled:** After an option is selected, the placeholder icon is replaced by the chosen value. The field reverts to its default styling and displays the phone number the user entered.
5. **Filled (menu shown)** The field contains a value and the country abbreviation dropdown is expanded. The entered phone number remains visible while the menu shows available options.
6. **Error:** Indicates a validation issue (e.g., required field left empty). Shows error message and optional alert icon. The input is invalid due to an incorrect format, missing required data, or a system-level issue. This state prevents submission until corrected and requires user action.
7. **Focus (menu shown):** Activated when the user clicks into the field or navigates via keyboard. Highlights the field to indicate readiness for input. The menu displays a list of options. Chevron icon flips upward to indicate expanded state. User can either enter in text or scroll to select an option.
8. **Disabled:** The field is inactive and cannot be interacted with. It does not respond to focus or input events.

Size

Phone inputs come in two height sizes: medium and large. Supporting multiple sizes provides flexibility when designing layouts, but consistency is key: use the same size for all form components on a page. For example, if you choose a large phone input, apply the same size to text inputs, buttons, and other elements. When in doubt, default to the medium size.

Size	Usage	Height	Target height	Min width	Max width
Medium	Ideal for space-constrained layouts or long, complex forms.	40px	40px	270px	800px
Large	Best for spacious layouts, simple forms, or standalone dropdowns (e.g., filters)	48px	48px	270px	800px

Dropdown menu size

Size	Usage	Height	Target height	Min width	Max width
Small	With medium dropdown fields.	48px	48px	-	-
Large	With large dropdown fields.	56px	56px	180px	800px

Used components sizes

These are the sizes of components that are used in the combobox and its menu.

Element	Medium	Large
Chevron icon	S	M
Helper icon	S	S
Check icon	M	M

Typography

Element	Medium	Large
Label text	heading-2xs-300	heading-xs-300
Placeholder text	body-s-300	body-m-300
Helper text	body-xs-300	body-xs-300
Dropdown item	body-s-300	body-m-300
